Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 and 2, drawn to a motor apparatus, classified in class 310, subclass 87.
 - II. Claims 3-5, drawn to method of washing a motor, classified in class 029, subclass 596.
2. Inventions Group I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the apparatus can be made by a materially different process, such as cleaning the motor components prior to assembly because motor claims do not require the washing of the motor only the ability to wash the motor by admitting and removing a washing fluid.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the method of cleaning the motor search required for Group II is not required for Group I, therefore the restriction for examination purposes as indicated is proper.

Art Unit: 2834

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
